

Culture FRQ

Globalization has had a major effect on culture. Write a letter to a friend in a foreign land explaining the culture where you live.

- a. Using two specific examples, describe globalization.
- b. List the five aspects of culture we discussed in class and describe one theme from each.
- c. Some argue that globalization has created a monocultured society, while others argue that it has led to cultural diversity. Which argument is more correct? Use a specific example to justify your answer.

*Note #1: What to write

- Part A: Two specific examples deserve two separate paragraphs.
- Part B: You are writing about the culture where you live. It can be the USA, Utah, Northern Ogden, Orion, your neighborhood, etc... It can, but doesn't have to be, about you specifically.
- Part B should be five paragraphs, one for each of the five aspects.
- Part C: Either answer can be correct as long as you justify your answer. Use examples to be specific.

Note #2: Formatting

- Just like before, you do not need and should not include an introduction or conclusion. It is a good idea, however, to rephrase the question in your answer.
- Your FRQ can be either typed or hand written. You can print it or email it to me at scwallace@wsd.net

Note #3: Grammar

- Don't write like you talk
- No questions in your writing
- Capitalize proper nouns, especially "I"
- No hyperbole (outlandish statements)
- No copy/paste – Write your own words and your own thoughts
